

## **Protection of Public Statement**

### **01/05/2021**

At Rapport Security Ltd, we recognise that the protection of the public is of the highest importance – now more than ever. Operating in the public domain means taking full responsibility for the health, safety, and security of the communities we serve, as well as our clients and our staff.

### **Commitment to Public Health & Safety**

In light of recent global challenges, including the COVID-19 pandemic, we are committed to creating a safe environment for everyone. We ensure that all COVID-19 procedures are followed by our staff and visitors at every client site, reducing risk and promoting public health.

### **Proactive Security & Vigilance**

Our responsibility extends beyond day-to-day security. We actively work to prevent harm to clients, their property, and the public by:

- Conducting Anti-Counter Terrorism (ACT) and Behavioural Detection Awareness training for all staff.
- Encouraging staff, clients, and associates to install and use the ACT App to stay informed about the latest threat alerts.
- Maintaining a culture of vigilance, ensuring that our teams are proactive in identifying and addressing potential risks.

### **Working Together for Public Protection**

Keeping the public safe requires collaboration. At Rapport Security Ltd, we believe in raising awareness, sharing knowledge, and working hand-in-hand with clients, communities, and law enforcement partners to maintain safe, secure environments for all.
